

Figure 1 is a scatter plot showing the positions of 55 radio sources in the RA vs. Dec plane. The x-axis is Right Ascension (RA) in degrees, ranging from 137.5 to 138.0. The y-axis is Declination (Dec) in degrees, ranging from 13.5 to 14.0. A large black circle is centered at approximately RA 137.75, Dec 13.75. The sources are categorized by color and shape: blue circles with a cross for d5ghz, orange circles with a cross for d7ghz, green circles with a cross for first, and red circles with a cross for vlass. Most sources are numbered 1 through 55. A legend in the top right corner identifies the categories.
