

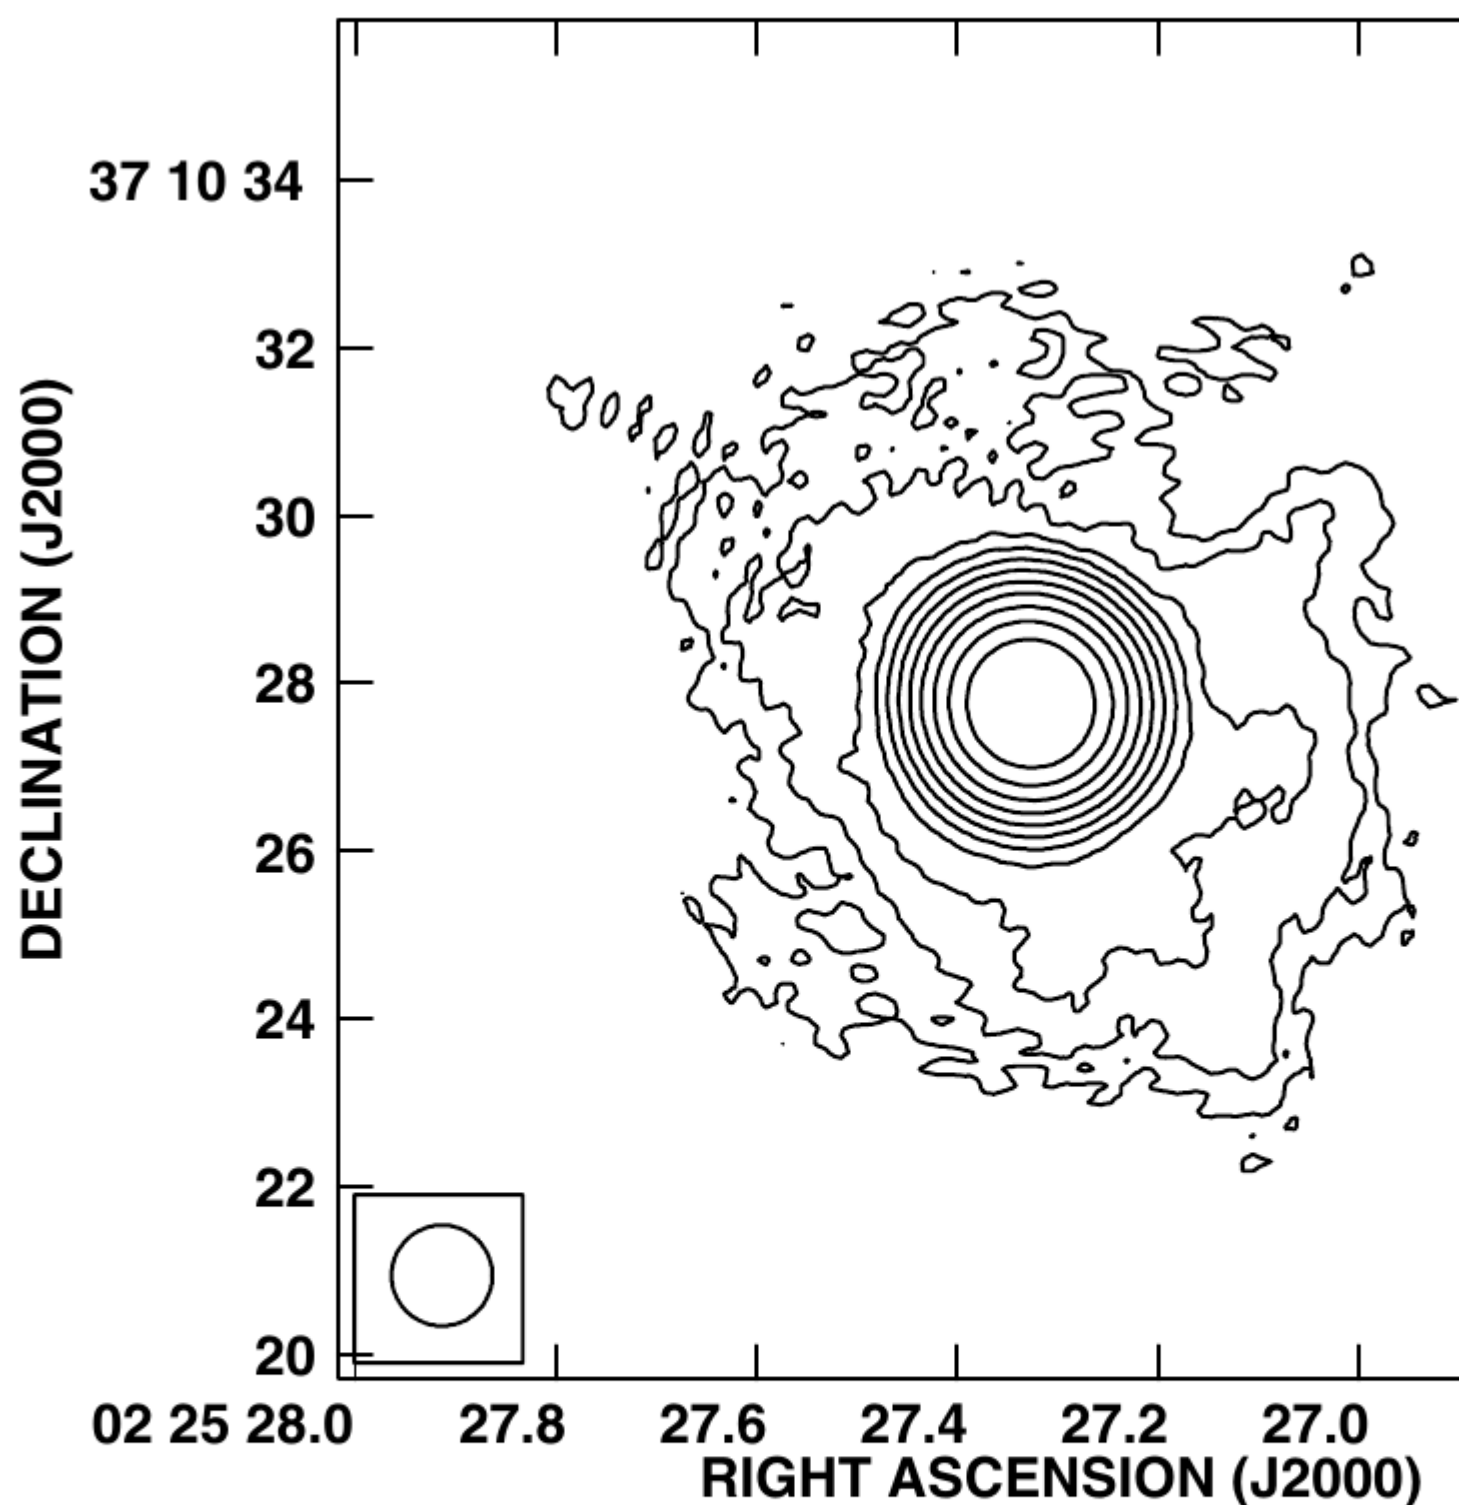

Fig. 2. Image of 0222+36 at 5 GHz, VLA in “A+B” configuration. Contours are traced at (1, 2, 4, 8, ...) times the 3σ noise. The lowest contour is $69 \mu\text{Jy/beam}$, the peak is 209 mJy/beam , and the beam is circular with a HPBW of $1.2''$.
